## **Updated Face Covering Policy**

Effective Date: June 14, 2021

In accordance with the May 13, 2021 guidelines issued by Centers for Disease Control and Prevention (CDC) pertaining to the usage of face coverings by individuals who have become fully vaccinated against COVID-19, the City of Mineral Point has made the following face covering policy changes:

*Effective Monday, June 14, 2021, fully vaccinated individuals are no longer required to wear face coverings while indoors at any buildings or facilities owned by the City of Mineral Point. Unvaccinated individuals do need to continue wearing face coverings while indoors at any City-owned buildings and facilities.*

*This policy also applies to those employees, service providers, volunteers, or other individuals who report to any City-owned buildings and facilities for work of any kind. Any unvaccinated persons in this category who occupy a fully-enclosed office qualify for exemption from wearing face coverings while working alone within that space.*

*Verification of vaccine status (e.g., by showing a vaccination card) will not be required for employees to go without a face covering indoors. Unvaccinated employees who are unable to wear face coverings due to disability or due to sincerely held religious beliefs may notify the City Administrator for assistance in requesting an accommodation.*

*Employees who have concerns regarding face covering compliance are encouraged to discuss their concerns with their supervisor. Employees and supervisors are prohibited from discriminating against individuals who choose to wear a face covering regardless of the reason. Please remember that there are a multitude of reasons why someone may choose to wear a face covering and wearing a face covering is not necessarily an indication that the person is not vaccinated.*

Issued: June 10, 2021
